

All-in-One | Enterprise-Ready | Digital Transformation Platform

AgilePoint Is Your One-Stop-Shop for Digital Transformation

The general market grew aware of low-code and no-code in 2016, when leading analysts Gartner and Forrester started advocating for it as a way to alleviate IT bottlenecks. However, AgilePoint started innovating the space back in 2003, and this thirteen-year head start is why AgilePoint is the only all-in-one hyperautomation platform on the market.

AgilePoint's Historical Innovations

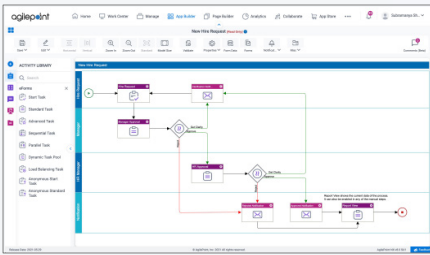

What is Hyperautomation?

As business executives are demanding a path to digital operational excellence, the need for democratization of process automation, data integration, efficiency, and speed is becoming more apparent than ever before. Not only that, but organizations are realizing that they need to be agile and have some sort of innate operational resiliency if they are to keep up with ever evolving market changes. As a result, they are turning to hyperautomation, or the orchestrated use of multiple technologies to automate as many business and IT processes as possible.

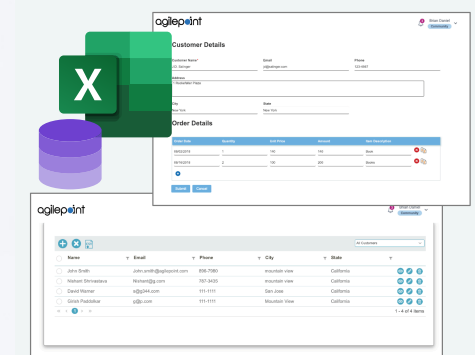

AgilePoint Core Capabilities:

Accelerate Agile Transformation

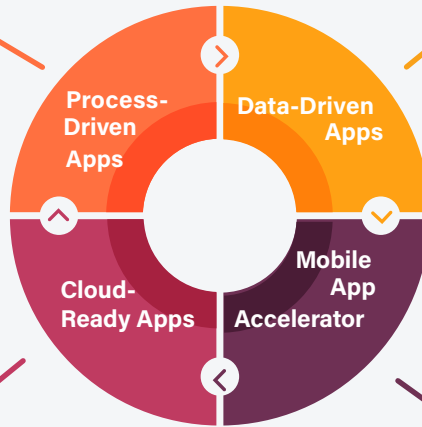

Easily create and maintain hundreds of process applications to automate customer journey, sales, marketing, back-end operations, and more.

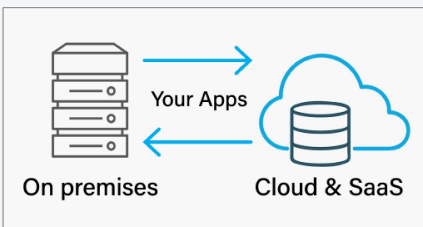

Drag and drop allows you to quickly develop forms and digital workplace apps that interact with multiple sources.

RPA Augmentation
 Extend RPA with robust human workflows
 UiPath – Blue Prism – Automation Anywhere – Microsoft Power Automate

Federated Multi-Region Deployment
 Regional Data Privacy Compliant

Build-Once and your apps are always on-premises and cloud ready transparently.

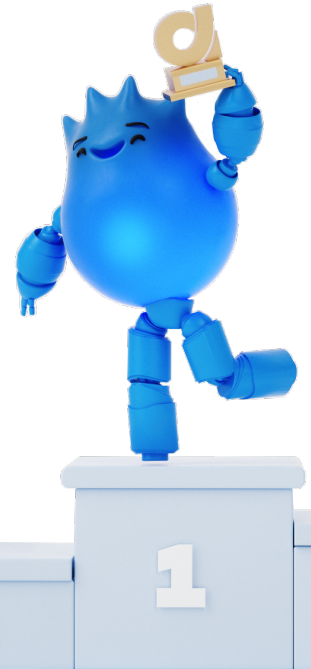

Build-Once and your apps are always mobile ready, including creating private-label, native mobiles apps.

Why AgilePoint?

→ A Complete Hyperautomation Kit

Technology Needed to Achieve Hyperautomation	AgilePoint Features
Artificial Intelligence (AI)*	✓
Event-Driven Software Architecture	✓
Robotic Process Automation (RPA)*	✓
Business Process Management (BPM)	✓
Intelligent Business Process Management Suites (iBPMS)	✓
Integration Platform as a Service (iPaaS)	✓
Packaged Business Capabilities	✓
Low-Code/No-Code Tools	✓

*AgilePoint integrates with AI and RPA providers. These are not innate platform features.

Unbelievable and Uncontested Results

Alberta Energy Regulator(AER)

AgilePoint allowed AER to create mission critical, complex compliance, and permit process applications for energy exploitation that lasting 10+ years.

Hitachi Automotive Systems

AgilePoint's integration with Salesforce is unmatched which empowered Hitachi to create a functional proof-of-concept global quotation process application in less than two weeks.

Elbit Systems

AgilePoint enabled Elbit to create a single purchase order application that could be consumed across all global subsidiaries without the need to create and maintain multiple versions.

AgilePoint Recognized in The Gartner Magic Quadrant™ For Enterprise Low-Code Application Platforms.

Gartner

AgilePoint Scores 5/5 in the Product Vision criterion in The Forrester Wave™: Low-Code Development Platforms For Professional Developers, Q2 2021.
